DETAILED ACTION

The restriction filed 3/22/04 is hereby vacated since the rejection was not based on the current pending claims.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: group I, directed to a system comprising two hollow fiber bioreactors (claims 24-28,33-35); group II, directed to a cell culture system (claims 30,31); group III, directed to a closed culture system (claims 39,40); group IV, directed to a method of culturing cells (claim 84); group V, directed to a mass transfer system (claims 85-114,133-135); group VI, directed to a method of separation (115-117,136-141); group VII, directed to a method of inactivating a pathogen (claims 118-121); group VIII, directed to a method of producing and isolating a product (claim 122); group IX, directed to a method of culturing cells (claims 123-126); group X, directed to a method of inactivating a pathogen (127,128); group XI, directed to a method for viral reduction (claims 129-132); and group XII, directed to a method of culturing cells using plates (claim 32).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A Redding whose telephone number is 571-272-1276. The examiner can normally be reached on Mon.-Fri. 6:00 - 3:00.
